Is Artificial Intelligence Good or Bad for Enago Academy

May 1st, 2020 - Artificial Intelligence although controversial is Artifticial Intelligence Good or Bad for Academic Research. Machine learning is thought to be a predecessor or a prerequisite to AI. There are concerns about the rise of AI but there are clear benefits to its use.
April 28th, 2020 - On the other hand the adapted deployments of machine learning algorithms at the edge empower the “smartification” across different layers e.g. from network communications to applications. This in turn allows new applications of machine learning and artificial intelligence opening up new opportunities.

April 29th, 2020 - Check out this great listen on Audible Artificial intelligence and machine learning are one area of life that will continue to interest and surprise us with new topics, products, innovations, and new ideas. Perspectives on the Impact of Machine Learning Deep
March 26th, 2020 - The fields of machining learning and artificial intelligence are rapidly expanding impacting nearly every technological aspect of society. Many thousands of published manuscripts report advances over the last 5 years or less. Yet materials and structures engineering practitioners are slow to engage with these advancements. Perhaps the recent advances that are driving other technical fields.
